Animationen
Simple animations can be realised using a GIF format (max. 700 KB), but with a maximum of 10 fps.

The advertising labelling and safe area must be adhered to!

Click-to-Video

A click-to-video campaign combines display and video elements

The Yellow Button interaction actively involves the viewer and thus increases the advertising recall. By clicking on the yellow button on the remote control, the advert appears.

CTV & Online Video

(In-stream and out-stream)

Best practices for video advertising creatives

- Aspect ratio: 16:9 (standard widescreen)
- Video length: 15-25 seconds (recommended)
- The following setups are not allowed (setting applied by RTL AdAlliance)

Automatically expanding ads

Inserted "close button"

Preset cappings (geo, FC, device, etc.) by campaign/agency

Subtitles/close captioning: VAST 4.1 enables subtitles/closed captioning by standardising the delivery of closed captioning files. Please make sure to include closed caption file.

For IO, please provide all creative material or redirects at least 5 days before campaign start. Delayed/incorrect delivery can lead to a delayed starting date of the agreed campaign and a punctual start is no longer guaranteed. Changing ads during the campaign period may only be carried out with tested advertising assets and in accordance with RTL AdAlliance.

Subject to prior consultation and agreements, other requirements may apply for individual forms of advertising/billing.
